## About me :

I am Abdul Aziz, Results-driven professional with 8+ years of experience in software development, Specialized in Mobile Application development. Currently leading mobile application development projects with a focus on iOS, Android and Huawei platforms. Adept at building robust Mobile Applications using technologies like React Native, Flutter, Swift, Android, Cordova. I am currently working as Software Team lead in Maren Solutions PVT LTD.

I am a specialist in crafting exceptional mobile applications. I am also Experienced and skilled in designing and developing Software Development Kits (SDKs) for mobile applications which extend the use of native features to cross platform development, ensuring a unified and efficient development process.

As an expert in mobile development, I bring valuable skills to the realm of web application development. I have successfully led teams in building high-performance web applications, utilizing modern frameworks such as **React, Vue, and Next.js** to create responsive, user-friendly interfaces that enhance user experiences across devices.

I have extensive experience in API development. I've worked with server-side languages like **Node.js, Python, and PHP** to design and implement scalable APIs, enabling seamless communication between applications. This combination of front-end and back-end knowledge allows me to contribute effectively to full-stack development projects, driving both mobile and web initiatives to success.

## Work Experience :

---

### ***Experience in Maren Solutions PVT LTD***

Joined this company in 2019 as a Full stack Software engineer and since then continued to actively contribute to the Maren Team.

( *Current Role - Team Lead* )

### ***My Key Responsibilities are :***

- Create and establish the project structure, laying the foundation for successful application development.
- Build the application barebones, incorporating essential features and functionalities.
- Assign tasks to team members, ensuring a well-distributed workload.

- Collaborate with Design and API integration teams to plan and strategize feature implementations.
- Facilitate knowledge transfer sessions to ensure the team's understanding of assigned tasks.
- Conduct thorough code reviews to maintain high code quality and adherence to best practices.
- Provide constructive feedback to team members, fostering a culture of continuous improvement.
- Developing and verifying Native features and Components in different platforms (IOS, Android, Huawei ) to enhance functionality and user experience.
- Prepare proof-of-concepts (POCs) for new requirements, validating feasibility and effectiveness.
- Plan sprint releases, coordinating efforts to meet project timelines.
- Publish releases to multiple platforms, including the Play Store, App Store, and Huawei App Gallery.
- Train and mentor junior developers and trainees, imparting knowledge and fostering skill development within the team.

### ***Experience prior to Maren Solutions PVT LTD***

---

Sizmic Labs ( 2016 - 2019 ) - Full Stack Developer

My Key Responsibilities are:

- Active participation in all phases of the SDLC, collaborating with team members to analyze, define, and deliver effective solutions to client requirements.
- Spearheading the development and maintenance of dynamic web applications, websites, and ensuring seamless functionality for both Frontend and Backend aspects.
- Leading the design and implementation of robust API solutions, ensuring smooth communication between diverse system components.
- Taking charge of the development and maintenance of custom websites, tailoring solutions to meet unique client needs.
- Contributing to the creation and upkeep of Software as a Service (SASS) products, providing scalable and innovative solutions.
- Expertise in the maintenance of WordPress websites, ensuring optimal performance and security.
- Development of custom plugins to extend functionality and cater to specific project requirements.
- Writing scripts to automate internal team work
- Crawling and Scraping to gather data from various niches of the website to provide to the marketing team.

## Technical Proficiencies

---

### Programming Languages:

- JavaScript, Python, Swift, Kotlin, Dart, PHP, SQL

### Mobile App Development:

- React Native, Flutter, Swift, Android, Cordova, NativeScript

### Web & API Development:

- **Frontend:** React, Vue, Next.js
- **Backend:** Express, Laravel, CodeIgniter, Django, Slim

### SDK Design and Development:

- React Native, Flutter, NativeScript, Cordova

### Databases:

- MySQL, MongoDB, SQLite, Realm

### Cloud Services:

- AWS (EC2, Lambda), Google Services (Firebase, Functions, Firestore, Realtime DB)

### Version Control:

- Git, GitLab, GitKraken, Fork, Sourcetree

### CMS Development:

- WordPress (Custom Theme and Plugin Development)

### Desktop Application Development:

- Electron, Flutter

### Education :

---

- **B.Tech** - JNTUH, 2011-2015
- **Intermediate (MPC)** - Govt Jr College Aliya, 2009-2011
- **SSC** - Sana High School, 2009

**Achievements :**

---

- Won first prize in the event robotic demonstration in "THE HYDERABAD STUDENT FESTIVAL" held in 2013

**Hobbies :**

---

- Web Designing,
- Listening Podcast,
- Workout,
- Writing Poetry.
